THE CHARLEROI MAIL

VOL. XX—No. 57. CHARLEROI, WASHINGTON COUNTY, PENNSYLVANIA, MONDAY, AUGUST 11 1919. TWO CENTS

FORMER GOVERNOR TENER WILL BE PRESENT AT CELEBRATION

Will Preside at Public Meeting To Be Held That Day

LAWRENCE H. RUPP, SPEAKER

The speakers committee of the Charleroi home-coming celebration to be held in Charleroi on Thursday, August 21, composed of J. E. Masters, chairman, and E. W. Hastings and W. R. Gaut, have secured the acceptance of former Governor John K. Tener to preside at the public meeting to be held that day.

They have also secured an acceptance from Lawerence H. Rupp, Esq., one of the leaders of the Allentown, Pa., bar, to make the principal address Mr. Rupp is not a stranger to the people of Charleroi, having appeared here in the high school auditorium some years ago , when he made a most favorable impression. Mr. Rupp is a close personal friend of Governor Tener, through whose good offices the local committee was able to secure him for that day

The time and the place of the meeting have not yet been decided but this feature will likely be disposed of by the general committee, possibly at its meeting this evening at the borough building .

All other features in connection with the coming celebration are moving along in a most satisfactory manner, and if the weather on the 21st is clear and bright Charleroi will have one of the greatest days in her history. The celebration has been well advertised in all the towns in this section of the valley, and will be given further publicity in all of the newspapers published within a radius of ten miles of Charleroi during the present week. Delegations are not only expected from every town in the local war chest district, but also from Monesen, Donora, Monongahela, Belle Vernon and Fayette City, as well as other communities at more distant points.

The official decorator, W. T. Hardester, of Pittsburg, is expected to be on the job this week, for he will not only have the street decoration to look after, but likewise a large number of business blocks and homes. Everything is working smoothly and harmoniously toward a great celebration.

VERY IMPORTANT COMMITTEE MEETING

An important meeting of all committess in charge of the details of the home-coming celebration will be held this evening at 8:30 o'clock, in the borough building. President Schafer desires that every member be present, as business of a most important character will be taken up for consideration. This meeting will be a general conference and reports will be made by all the sub-committees.

LEARN WITH REGRET OF DR. KALBFUS DEATH

Charleroi sportsmen and particularly those who are members of the Mountain Club, learned with regret this morning of the death of Dr. Joseph M. Kalbfus, secretary of the game commission of Pennsylvania, and E. E. Kelly, of Dubois, both of whom were killed at a railroad crossing at Saybrook, near Warren, on Sunday. Dr. Kalbfus had been connected with the State game commission for years and at the time of his death was on a tour of inspection in company with John M. Phillips, state game commissioner, and Dr. Penrose, of Philadelphia.

BRINGS SUIT FOR HEAVY DAMAGES

Nicholas Kline has instituted a suit for $10,000 damages against the township of Carroll for personal injuries sustained by a fall from a walk in that township, an extension of Main street, Monongahela. It is averred that formerly a railing or barrier was erected along one side of this walk, to protect pedestrians, but that this had fallen and had not been replaced. This fact was not known to the plaintiff, he avers. He reached for it and it not being there he became overbalanced and fell to the ground below. He suffered some broken ribs, one of them penetrating his lungs.

MINERS ASK FOR BETTER CONDITIONS

That miners of District No. 2, U. M. W. of A., will demand a scale calling for $6 a day and five days a week with numerous other changes in the present scale and working conditions is shown by a report of the proceedings of the convention held by representatives of miners of Territory 3. of District 2 at Portage, in Clearfield county. The miners demand that company house rents be based on $1 a room a month, and that all rooms be papered once a year at the expense of the company. Such houses are to be provided with electric or gas lights, free of charge to the occupant, and the houses are to contain bathrooms where possible.

Another provision provides that "all coal companies must provide hot and cold water shower baths for the miner, with safety to his comfort and clothes, same to be furnished free of charge to the employes."

COMMITTEE MEETING.

A meeting of the Decorating Committee of the home-coming celebration will be held this evening at 7:30 o'clock, at the office of the West Penn Power Company. 612 Fallowfield Avenue.

Hospital Campaign Will Rest Until Site Is Selected

Pending the selection of a site for the new hospital building, by a special committee, of which Hon. J. W. McCaig, chairman of the Appropriations Committee of the House, and Dr. E. W Martin, of the State Department of Health, will be members, all activities in connection with the hospital campaign will be at a standstill.

It is realized by the local committee that no progress can be made while the site question is pending, and until it is settled it would be simply a waste of energy to continue an active campaign. The data desired by Dr. Martin for the use of the committee is being forwarded to Harrisburg today, and with this material available it is the hope of the local committee that this special committee, which will be composed of three members, can find it convenient to visit Charleroi and the other towns concerned in the movement, some day this week.

The local committee was unable to get in touch with Dr. Baldy of Philadelphia, so that it is likely that Dr. Martin and Mr. McCraig will select the third member of the committee. When this committee is ready to go over the district the special committee of three, one each from Charleroi, Monessen and Donora, who are to act in an advisory capacity, will be notified and all preparations made for the inspection.

Mr. McArt, the organizer now in charge, deems therefore that the best policy is to let up on activities for the present, to take them up again when the special committee has made its report. This should be within the next ten days.

BOARD OF TRADE TO DISCUSS CAR FARES

A meeting of the Charleroi Board of Trade will be held at the Hotel Wilbur, Wednesday evening, August 13, at 6 o'clock. At that time the local street car fare question will be taken up and discussed, and if deemed advisable, possibly some action taken with a view of having a slight change made in local fare zones.

It has come to the attention of the Board of Trade that it costs ten cents to ride from Fifth street to Speers and other points beyond, while by walking to First street and boarding the cars there the fare is five cents. The Board of Trade is of the opinion that such an arrangement is discriminating against Charleroi, and will endeavor to have this condition remedied. As this is a matter of vital importance to all the business men of the community. President Schafer desires that there be a full attendance of members.

STEEL PRODUCTS MILL HAS BEEN CLOSED DOWN

A notice was posted at the Pittsburgh Steel Products mill in Monessen on Saturday, notifying the men that work had been suspended indefinitely, and that all men would be paid off on Thursday. Lack of orders is given as the cause.

ANOTHER MURDER IN IN MONESSEN SATURDAY

Albert Floyd, colored, aged 20 stabbed his wife, Brunie Floyd, aged 22, to death on Saturday night last in front of their home on Third street in Monessen. Floyd used a penknife in making the assault. He was arrested an hour later near the bridge and is being held in the lockup pending the verdict of the coroner's jury. He admitted his guilt.

LOSES $200 WHILE HUNTING A WIFE

Frank Castra, of West Brownsville, is out $200, and Joe Fulci, whom he presumed was his friend, is in the Washington county jail on a charge of highway robbery, all of this resulting from a venture which Castra believed would lead to a matrimonial engagement and in which Fulci was to be leading man in securing a desirable companion for Castra.

Fulci is declared to be a "bad man." He is said to have been tried in Greene county as a " Black Hander", accused of having extorted $10 from a Rices Landing woman. The jury hearing the testimony disagreed. While Fulci was being held for another trial, the home of his accuser was dynamited and all the witneses fled the country, with the result he had to be dischargd.

Fulci was placd under arrest at West Brownsvile by County Detective George Marker Tuesday evening. He was immediately taken before Justice of the Peace Charles Eckels and held for court without bail as a result of the testimony given at the hearing.

Castra in his story said he was anxious to get married and that Fulci promised to get him a wife for $200. Castra was willing. On June 13 Fulci and Castra left Brownsville at 8:30 o'clock and arrived at California at 8:45. Strolling about the town for a time , Fulci finally suggested that they take a walk. Their promenade took them to a particularly dark spot. Just as they entered, a man jumped in front of them with a gun leveled and demanded "hands up." Castra threw up his hands and claims Fulci grabbed him as he did so. While he was held the other man went through his clothes and secured the $200 which he had intended to pay Fulci when he had met and become engaged to the woman he was to marry.

After being relieved of his money, Castra was ordered on his way, while Fulci forsook him and remained in the company of the gunman, Castra claims.

Our lenses are guaranteed by the manufacturer to meet all State motor laws. Regan and Hormell.52t6

STEAMBOATS COLLIDE IN FOG, ONE IS RENDERED HELPLESS

A "Fog Bank" Is Given As The Cause Of The Accident

STEAMER HECLA DAMAGED

One of the most disastrous steamboat collisions on the Monongahela river, since the Monitor was sunk off Second street, Charleroi, when it ran into the tow of the steamer Duquesne in October, 1917, occurred at a point near the Catsburg mine, Monongahela last Saturday morning about 6:30 o,clock, when the steamer W. H. Clingerman ran into and almost wrecked the steamer Hecla. It was a rear-end collision, in which the wheel of the Hecla was practically destroyed and other portions of the rear of the boat badly damaged.

Both boats were towing coal for the Carnegie Steel Company, having large cargoes consigned to the by-product plant at Clairton. The Hecla, owned by the Hillman Transportation company, had taken the place of the Braddock in the line temporarily and had cleared through Lock 4 about 4 o'clock in the morning. The Clingerman followed at 5 o'clock. According to members of the crew the steamers encountered what is known as a "fog bank," which made navigation dangerous. The Hecla was in the lead but the Clingerman was coming behind at full head when the fog suddenly shut down on both boats. The Hecla was drifting, but the Clingerman coming from behind, shoved one of her steel barges directly into the wheel of the Hecla, raising it two feet out of the pillow blocks, and rendering the smaller boat practically helpless. The wheel rested on the loaded barge, and for a time it looked as if the barge would sink, but prompt work on the part of the crew saved it. The Clingerman backed both tows to the bank, and work began immediately of getting the Hecla off the barge and saving the craft and coal. The Hecla was released about 4 o'clock, while it was found that the barge had not been damaged.

Only the fact that the engines of the Hecla were set on steel bed plates prevented them from being displaced and the entire engine room wrecked. A new type of wheel on the Hecla also saved the boat from more serious damage. As it was, several hundred dollars' worth of damage was done to the Hecla and it will be necessary to place her on the ways for repairs. The impact of the barges with the boat threw those members of the crew that were in bed at the time out on the floor, the force of the collision being so heavy.

The Hecla was formerly the Active of the Pittsburgh Coal company, and was built about six years ago at the Elizabeth Marine Ways. She was purchased by the Hillman transportation company several months ago and her name changed. Recently this steamer

CENTERVILLE CHURCH OBSERVED ANNIVERSARY

The Centerville M. E. Church on Sunday observed its 47th anniversary in a fitting manner. The celebration was in the form of an all-day meeting and proved to be very interesting. The morning sermon was preached by Rev. J. H. Henry, of Los Angeles, California, who was pastor of the church at the time of the erection of the building in 1872. The afternoon speakers were Byron E. Tombaugh of Washington, J. T. Jones of Centerville, who read a history of the church, Simon Deems of Beallsville, and Winfield Richardson of Bentleyville.

READY TO START ON NEW ROADWAY

Construction work on the improvement of Route No. 268 of the State Highway system through East Bethlehem township, will begin early this week, according to a statement made by H. C. Brooke, of the firm of Brooke & Cornish, of Uniontown, the successful bidders for the work. The only preliminary remaining to complete the awarding of the contract is the approval of the bond of the contractors which has been forwarded to Harrisburg to the State Highway Department.

On Thursday last Mr. Brooke and District Engineer W. D. Myers of the State Highway Department, went over the route, making preparations for an early start. The township commissioners at a meeting held a few days ago, guaranteed the State Highway Department that all detours made necessary by the improvement would be maintained by the township.

FAILED TO SOLVE MOTIVE FOR DEATH OF WILLIAMS

No testimony that would solve the mystery surrounding the death of James F. Williams, colored, who was found along the road between Phillipsburg and California last Tuesday morning, was given at the inquest held by Coroner Heffran last Saturday morning. The jury found the man was murdered but held no one responsible.

RECORD PRICE IS PAID FOR WOOL

The high cost of clothing is reflected in the present prices paid for wool. J. N. Franklin of South Franklin township, this county, has sold his clip of wool, amounting to 175 fleeces, at 80 cents per pound. This is the top price paid for Washington county wool so far as can be learned.

All members of the Protected Home Circle are requested to meet on Wednesday evening at 8 o'clock in the I. O. O. F. Hall. Installation of officers. Refreshments will be served after business meeting. 57—t2

THE HOUSE PLEASES ITSELF

The average citizen has noticed that soda-fountain drinks formerly costing five and ten cents now cost ten, fifteen, twenty and even 25 cents—a result of the effort to make soft drinks return a part of the revenue lost on banished intoxicants and the determination of dealers to pay no part of the tax themselves. On a very hot day recently Congress noticed this, too, and in consequence the House decided that ice cream and soft drinks are not luxuries and should not be taxed. Those interested in the perplexing task of providing the lost revenue protested that the repeal would sacrifice $21,000,000 annually, but the House was finding its collars intolerable and wanted its ices and cooling drinks at the old price, and so without a record vote it approved the repeal of the section of the revenue act passed at the last session placing a tax of ten per cent on virtually everything sold at soda fountains. Then it voted to reduce the tax on fruit juices to 2 cents a gallon.

This shows that Congress can act quickly enough when it is hot and thirsty. But whether the old prices of soft drinks will return remains to be seen; prices go up much more readily than they come down. In pleasing itself the House undoubtedly pleased the thirsty public of summer time. Only the worried revenue providers were not pleased, but they will not receive much sympathy. Let them rack their brains—even tear their hair if they must—in their anxious strivings to supply the revenue lost on banished intoxicants. Nobody cares. What everybody, including Congress itself, wants at present is cheaper cooling drinks.

THOSE OWLISH GLASSES

It seems that the American Medical Association has warned the public against tortoise shell or horn rimmed glasses and spectacles on the ground that lenses so rimmed frequently turn in their frames, thus causing strain and injury to the eyes. The brief outline before us of this medical authority's announcement does not explain why lenses so rimmed are apt to turn, but a correspondent of the New York Sun, a wearer and lover of tortoise shell rims sadly confesses that the turning does take place, explaining: "If a man wearing tortoise shells goes from a warm temperature to a cold one the frames of the glasses will crack. This is because the cold contracts the frames and as the glass won't give to allow for the contraction the frames must. Then the lenses will turn and destroy the focus." Therefore he reluctantly concludes that "there is no sense in wearing glasses for the effect they have on your appearance" and it is "better to turn to some other style rather than run the risk of having the eyestrain increased."

Why the tortoise shell rims were supposed to be beautifying in "effect" has remained a mystery to many observers who have regarded them, on the contrary, as distinctly disfiguring. Perhaps near-artists and Greenwich Village Poets can answer, for these are understood to be ever on the lookout for means of startling the eye of the beholder and setting themselves apart from the great meliocracy. Whatever the explanation, many who have not yet yielded to the horn-rimmed vogue will be glad of a substantial excuse for declining to make themselves look like owls through the adoption of huge dark rimmed glasses or spectacles.

NOT JUSTIFIED

President Wilson says that present food prices are not justified by shortages either present or prospective.

This comes as official from the chief executive but it is not really news to the people. They have believed this for the these many months, but a belief in these conditions did not make foodstuffs any cheaper. In spite of this fact they have kept on the upward trend, and it is a question if we have seen the end. Congress will now battle with the question, and people will expect results. The great majority believe there is no valid reason for the advances that have taken place during the past year. Sugar brokers arrested in Pittsburgh last week were instructed to "get the money." It was not a question of selling at a fair profit, but of charging customers all they would stand. This is the condition of affairs that must be improved. The people have been exploited enough, and profiteers should be hunted down and punished.

This is a good time for the American people to reason together. While a spirit of unrest appears to prevail, there is nothing in the situation to cause alarm if we do not become panic stricken. There are tense conditions prevailing all over the world, and the high cost of living adds a very disturbing feature. Once this situation is controlled there will be little to fear from any untoward incident which might cause a general strike throughout the land. The American people are noted for their clear-headedness and their ability to cope with any situation that might arise, and they will be able to solve the troubles which now are the cause of apparent discontent throughout the country.

Mt. Clemens News Bureau, said to be owned and operated by Henry Ford has been sending a letter through an auxilliary publishing agency offering to furnish them weekly reports of the Ford libel suit against the Chicago Tribune, now about closed, and the speeches of President Wilson on his proposed "swing around the circle." After the exhibition given by Henry on the witness stand in his own behalf it is evident he would gain more popular favor if he would stick to the job of making his famous flivers.

Making long-distance shipments by truck is becoming very commonplace nowadays and the innovation is apt to cut quite a figure in freight movements within a few years. When the comprehensive road program such as Pennsylvania has under way at the present time, are completed the auto truck will become more popular than ever in the movement of light freight, and in some cases of shipments of a heavier character. The next generation will see many new departures in this line, all of which will have a tendency to more rapid transit.

President Wilson has directed that all striking shopmen and other railroad employes now out return to their work, before the question of an increase of wages be discussed. With conditions as near normal as possible, and neither side stirred up by the cessation of labor and its incidental trail of circumstances, it will be easier to discuss the questions submitted, both as to the high cost of living as well as the increase of wages than if turmoil existed.

If it is true there are immense amounts of food stored to keep up prices the government ought to have something definite to say about it for government is instituted for the preservation of life, primarily, and food shortage is a matter of life and death. Under conditions of necessity artificial famines become crimes.

As styles in dress in Abysinnia are said not to change more than once in a thousand years the remark of Prince Nadoa, of the Abysinnian mission, that he would like to see the women of his country dress like American women may be described as revolutionary as well as complimentary.

This is called a young country, yet 300 years have passed since the first legislature assembled in America, the House of Burgesses meeting at Jamestown, Va., on July 30, 1619. A country with a record of three centuries of constitutional government is no parvenu.

All the agencies of the federal government except possibly the Supreme Court, are now squarely on the offensive against high food prices. Supporting them are the forces of several State and municipal governments. The people now await the outcome.

In 43 tenement houses in a block of East Thirty-third street, New York, inhabited by 1703 persons, there is only one bathtub. Sounds almost medieval.

Peace has come and war news has departed from the front page, yet no less than 23 wars are said to be still in progress on the surface of the planet.

It would appear that the negro who elects to live in Chicago is not afraid to take risks.

Michigan only threatens to bar the packers' combine out of the State, but a threat is at least a beginning.

Advertise that vacant room in the classified column of the Mail.

Foundation of Brotherhood.

"The doctrine of the Brotherhood of Man is a beautiful dream, but it remains forever the baseless fabric of a dream, unless it is founded upon the deepest of all realities, the Fatherhood of God. To better our social conditions we need close thoughts, careful study, a diligent application of the best methods, but at last without faith in the eternal foundations there can be no final adjustment of social difficulties, and all earthly wisdom is but as sounding brass and clanging cymbals."—Dr. Samuel Smith.

Prepared.

A train, running on a line which had achieved an unenviable notoriety for slowness and unpunctuality, after losing considerable time in a short journey, suddenly stopped in the midst of fields. "Guard!" shouted a jovial passenger, "may I get out and pick some flowers?" "Afraid you won't find many about here," said the conductor, goodhumoredly. "Oh, there'll be heaps of time," replied the jovial passenger—"I've brought a packet of seeds."

Snakes in the Ocean.

There may or may not be such a thing as a sea-serpent, but there certainly are snakes in the ocean. There are numerous varieties of small snakes that live in all oceans; then there are the eels, of course, which go from the salt water to the fresh. In the waters around southern Asia there lives the banded sea snake, which has stripes around its body and broad tail, and can swim with great speed.

Rich Rhine Country.

Strange to say, the fine grapes are grown on the eastern slopes of the Rhine and the choicest varieties, as Johannisburger and Steinberger, are produced higher up the river, south of the Rhine province. It is, nevertheless, the land of the vine, especially the Moselle valley. The substantial claim of the province is its mineral wealth.

World's Lightest Wood.

The balsa tree, which is now being cultivated in Costa Rica, produces the lightest-known wood in the world. It is in great demand for all purposes where lightness of construction is of importance, it is very porous and a good insulator and is much used in airplane building, as it offers the minimum amount of air resistance.

The smallest dependency of France is the Ile d'Hoedic, situated at the east of Belle Isle. Its population is 238. The people do not speak French, but Celtic. Fishing is the principal industry, and all the inhabitants are provided with food at an inn managed by the women. The town has no streets. The houses are mostly of mud.

Boring Rubber Corks.

To bore a hole in a rubber cork is a problem to anyone who does not know the trick, but simple enough when that is known. It is to moisten the borer with a little of a fairly strong (say 10 per cent) solution of caustic soda or potash. It will then cut the rubber with little more difficulty than it will cut cork.

Polish Up Your Buttons.

To restore fine pearl buttons to their former color and luster wash in warm water and soap suds, then dry and polish with a nail buffer and a cake of nail polish. Now that it is difficult to get the finer quality of buttons, this method is satisfactory—the buttons look like new.

On Loving.

"What I can't understand is that if people want to be loved—and everybody does—why in the name of goodness don't they do a little loving on their own account? You needn't expect to get what you don't give."—"Kitty Canary," by Kate L. Bosher.

The Rose's Name.

The name "rose" varies only slightly among different nations. The Romans called it rosa—a form adhered to in Italian, Portuguese, Spanish and Russian. In Polish it is roza, in Dutch roos, in Swedish ros, and in French, German and Danish rose.

Thousands Exterminated

Tape-Worms With Head

Thousands are suffering from tape-worm, but are treated for some other disease without getting any result.

A SURE SIGN of the presence of these parasites is: Passage of round, longitudinal or pumpkinseedlike particles or other worms.

Suggestive signs are: Pale, bloated appearance, dark rings under the eyes, emaciation, continuous spitting, coated tongue, loss of appetite, with occasional greediness indisposition after taking certain food, as: Herring, Onions, Vine, etc., even spells of fainting with an empty stomach, appearing indolent, raising of obstruction in the throat, sour stomach, heartburn, pain stomach, head-ache, humming in ears, with ing of having a heavy moving mass in the bod cutting pains in intestines, rumbling and wavelike movements, palpitation of the heart, exhaustion, heaviness in limbs, sediment in urine, etc.

In addition thereto, may exist sympathetic disturbances which sometimes assume a grave character, hemorrhages, menstrual irregularities, hysterical fits, choreic convulsions and even epileptic attacks.

MY METHOD EXPELLS THE TAPE-WORM

within one to four hours, without danger, painlessly, no fasting, no detention from home or work.

Time and Watch on Shipboard.

The bell on shipboard is struck every half-hour. In the morning one bell sounds at 12:30 a. m. and every half-hour increases until eight bells at 4 p. m.; then one bell again at 4:30 a. m. to eight bells at 8 a. m., one bell again at 8:30 a. m.; and eight bells at noon. In the afternoon one bell sounds at 12:30 p. m., and eight bells at 4 p. m., after which is the first dog watch (one bell 4:30, two bells 5, three bells 5:30, four bells 6), and the second dog watch (one bell 6:30, two bells 7, three bells 7:30, eight bells 8), and then one bell at 8:30 to eight bells at midnight.

The day is divided into seven watches, as follows: Afternoon watch, noon to 4 p. m.; first dog watch, 4 p. m. to 6 p. m.; second dog watch, 6 p. m. to 8 p. m.; first watch 8 p. m. to midnight; middle watch, midnight to 4 a. m.; morning watch, 4 a. m. to 8 a. m.; forenoon watch, 8 a. m. to noon.

"Swan" Is Really Goose.

The Chinese "swan" is not really a swan, but a goose. It has achieved a vicarious reputation as a swan merely because of an extremely long neck, not properly belonging to a goose, but altogether swanlike.

The lady swan, instead of pursuing the birdlike motherly habit of sitting on her eggs in order to transform them from mere eggs into baby swans, carefully covers them up with a mound of sticks and things.

The Chinese swan is known in highbrow circles as a Cygnopsis cygnoides. It is a most peculiar bird with a large wart on its bill, which is as yellow as the royal dragon of China. It has a disposition as mild as that of the Chinese nation itself, is given to secret diplomacy, has a large appetite and is extremely loquacious in a swan-like, restrained, Chinese manner.

Association of Ideas.

"Why do you object to the study of botany in the schools?"

"It nearly ruined my digestion," said Mr. Growcher. "I cultivated the habit of calling vegetables by their Latin names until nearly everything I ate sounded as if it had come out of a doctor's prescription."

Administrator's Notice.

ELLSWORTH TAKES THE OPENING GAME

In one of the best played games of the season the Ellsworth baseball team won over Charleroi on Saturday afternoon by a score of 3 to2. The game opened very auspiciously for Charleroi, as they scored two runs in the first inning, but after that Krepps, who was pitching for Ellsworth, put up the sign "Nothing doing," and thereafter Charleroi was unable to cross the plate.

The first man up for Ellsworth, Hi Elliott, smashed a two-bagger to right field but clever playing on the part of the home team prevented any scoring. In the second inning, however, Ellsworth managed to put a run over, and no further scores were made until the sixth inning, when the Ellsworth shortstop poled one over the river bank for a homer. This tied the game, and it remained knotted until the ninth inning. With two men out the middle fielder of the visitors, who previously had been giving exhibitions of club swinging at the home plate, landed on one of Braithwood's straight ores and it sailed over Guder's head in right field for a double. Dillon, next man up, smashed a hot one past second, which Urben managed to stop, but could not handle in time to throw out the runner. In the meantime the man on second had put on a burst of speed and crossed the plate with the winning run. Charleroi went out in order, the game ending in a fast double play.

The batteries were Krepps and Makepeace for Ellsworth and Braithwood and Claybaugh for Charleroi.

The same teams will play at Ellsworth Wednesday evening, and on Thursday evening Monongahela will play at the local park, game being called at 6:30. In the series now under way Monongahela leads with one victory and no defeats, Ellsworth second with one victory and one defeat, and Charleroi third with one defeat.

NOTICE

Sealed bids will be received by the Borough Clerk of Charleroi for the unused Police Patrol. Bids to be in the hands of the Borough Clerk on or before August 19, 1919. Council reserves the right to reject any or all bids.

Ira L. Nickeson,

STEAMBOATS COLLIDE

Continued from Page 1

underwent extensive repairs and was considered in A-1 condition.

The Carnegie Steel company is somewhat crippled for motive power at the present time, the Clairton being in the shop. The Braddock had taken her place, but she was withdrawn a short time ago for repairs, and the Hecla was filling in when the accident happened.

It was admitted that the Clingerman would have passed the Hecla had not the fog suddenly shut down on both boats, making it impossible for the pilot on the rear boat to see the one ahead.

Avoid arrest by having your Auto Headlights fitted with approved lenses at Regan and Hormell's. 52t6

HEAVY MORTALITY IN WESTMORELAND DOGS

Constables in Westmoreland county to date this year have been paid $3,149 for killing and burying dogs. The sum paid out by the county for sheep damages for the same period is $1,144.50. Constable Huffman of Mt. Pleasant township was "high man" in the dog execution game, getting $757.

A foreign miner, hurt by a fall of slate in mine No. 2 at Ellsworth this morning, was brought to Charleroi today noon on the way to the Mercy hospital. The man was injured about the hips and legs. He arrived at the local station a few minutes after the 12:40 had left for Pittsburgh.

Dr. Harry E. Power, of Akron, Ohio is visiting his brother, Stanley A. Power, at 129 McKean avenue.

Real Meaning of Expression.

"Don't care a fig" is one of the commonest of expressions, but it isn't correct and means little, whereas the original has some real meaning: "Don't care a fico." The word fico is used by Shakespeare and is a Roman word meaning a contemptuous snapping of the fingers.

Greatness.

Greatness is the aggregation of minuteness; nor can its sublimity be felt truthfully by any mind unaccustomed to the affectionate watching of what is least.—Ruskin.

Paraffin Replaces Oil.

Paraffin for oiling wood-working tools is preferable to oil or grease. It costs little, is easily applied, and may be carried in one's pocket unprotected.

Sport.

Said the near cynic: "When a man is alluded to as a poor fish he may be sure that somebody is making game of him."

Getting and Giving.

What makes the Dead sea dead? Because it is all the time receiving, never giving out anything.—D. L. Moody.

By Way of Explanation.

No, Carrie, the expression, "piping times of peace" has nothing to do with smoking the peace pipe.

Current Crop.

Do you know that great light bills from little glass bulbs grow?

Daily Thought.

A little wind kindles, much puts out the fire.—Herbert.

NOTICE

Eicher & Eicher, Attorneys.

Whereas, evidence concerning the alleged absence of Peter Russell, Jr., lately a resident of Unity Township, in the County of Westmoreland, and State of Pennsylvania, a supposed decedent, and the circumstances and duration thereof was heard by the Orphan's Court of Westmoreland County on the 8th day of August, 1919, and whereas it was then ordered and decreed by the said Court that the legal presumption of the death of the said Peter Russell, Jr., was made out and established in pursuance of the said order and decree, you the said Peter Russell, Jr., if alive or any person for you, hereby are required to produce on or before the 22nd day of November, 1919, to the said Orphans Court satisfactory evidence of the continuance in life of the said Peter Russell, Jr., and notce hereby is given that if at the said date, satisfactory evidence of the continuance in life of the said Peter Russell, Jr., shall not be forthcoming, a decree will be entered by said Court directing the Register of Wills of the County of Westmoreland to issue letters of administration upon the estate of the said Peter Russell, Jr., to the party entitled thereto.

PER CURIAM.

Attest: Edward A. Cremer, Clerk.

NOTICE

There will be a meeting of the committee that met with the Greensboro Gas Company. Some unfinished business will have to be attended to. Tuesday evening, August 12, at 8 o'clock sharp. All members of that committee are requested to be present. Capt. J. K. Hein, Chairman. 57t2*

When Man Ate Grass.

M. Marcel Baudouin, who has been examining some human remains, dating from the neolithic epoch (the latest period of the stone age), has presented the Academy of Science with a curious report. The shape of the incisor teeth of two young children of this distant epoch leads him to the conclusion that the present single root teeth of human beings are in reality a development from three germs, and that man is descended from the herbivorous animal with an ancestor possessing 132 dental germs.

England's First Typewriter.

So long ago as 1714 a patent for a typewriter was taken out in England by Henry Mill; it was called a "machine for impressing letters singly and progressively as in writing, whereby all writings may be engrossed in paper so exact as not to be distinguished from print." His machine was very clumsy, and it was not until more than a century later (1829) that anything further was attempted. Then the first American typewriter, "called a typographer," was patented by W. A. Burt.

Tunnels and Geology.

Geologists owe much of their knowledge of the Alps to the tunnels which have been bored through these mountains to make railway routes between the northern and southern parts of Europe. There has been no more important discovery made in this way than during the construction of the Loetschberg tunnel. This was the unexpected piercing of a great coal seam in the center of a mass of much younger Triassic stone.

Accidents at Different Ages.

One of the large casualty companies has prepared a compilation showing the percentage of deaths due to accident at different ages. Out of a total of 713,801 deaths embraced in the compilation, 21.1 per cent were persons from fifteen to twenty-nine years old; 16.1 per cent, thirty to thirty-nine; 12.3 per cent, forty to forty-nine; 8 per cent, fifty to fifty-nine, and 4.7 per cent, sixty to sixty-nine.

Has Two Independence Days.

There is one country on the American continent, Ecuador, which actually boasts of two national days. These independence days of the little republic are the 9th of August and the 9th of October, and mark two determined revolutions, the first of which failed, only to spur the patriots, revolting against Spanish domination, to shake it off, a few months later, forever.

Got George in Wrong.

Little Ethel, whose big brother, George, was her teacher's beau, walked proudly to the desk with her examples worked neatly. The teacher, after looking them over, said "Ethel, I don't like your methods." "Well, then," said Ethel, "I'll tell my brother, George. He wrote them for me."

His Great Task.

"I want to get some information," said the tired man with three suitcases. "Why don't you apply to the bureau of information?" "I'm working up to that. First I've got to get information as to how I can find the bureau of information."—Washington Star.

Guard Your Work.

Do not work so hard that you have no time to look up and around you, no time to exchange ideas with another, no time for quiet thought. To work without growth means exhaustion. The spring itself must be fed if its waters are not to fail.

Fox Farms.

There are ten or twelve fox farms in Alaska. One of them, situated in the Tanana valley, a mile and a half from Fairbanks, consists of ten acres of cleared land, the greater part of which is covered with pens in which the animals live.

Suspicious Creature.

"A hard woman to please." "How so?" "When her husband telephones that he will be detained at the office she wants to know whose office and the nature of the detention."—Birmingham Age-Herald.

A Billion Silver Dollars.

One billion silver dollars, laid in a row, says Gas Logic, each coin just touching the one before it and the one following, would form a line that would reach practically around the entire world.

Tea Blending Practical Monopoly.

The business of tea blending is peculiarly British. For 100 years Mincing lane has blended tea for the whole world and brought the work into the region of an exact science.

Bees as Weather Guides.

Bees are good weather guides, being sluggish and inactive in the morning if the day is going to be wet, and active and lively if it is going to turn out bright and fine.

What Our Heirs Think.

"Our lowest ambition should be a life of ninety years," says a noted physician. Well, it is sort of a low ambition just merely to hang on.—Boston Transcript.

HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well.

"My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. It relieved me from my troubles so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.

Sometimes there are serious conditions where a hospital operation is the only alternative, but on the other hand so many women have been cured by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, after doctors have said that an operation was necessary—every woman who wants to avoid an operation should give it a fair trial before submitting to such a trying ordeal.

If complications exist, write to Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice. The result of many years experience is at your service.

After Baby's Bath

10,000 nurses will tell you that nothing keeps the skin so free from soreness as

ADVERTISE YOUR FURNISHED ROOMS IN THE CLASSIFIED COLUMN OF THE CHARLEROI MAI-

True Patriotism.

Had I a dozen sons—each in my respective—I had rather had eleven die nobly for their country than one vegetate obscurely out of action—Shakespeare.

Just Interested.

One day Jay Gould was looking at the death notices and was asked why she was reading them. "I want to see if C. is dead yet."

What Is Truth?

A local minister delivered a discourse to his congregation on the old question, "What is truth?" notes the Los Angeles Times. Many learned discussions have been held on this theme in the past and men will probably continue to debate the subject for centuries to come. The fact, however, is that most people know more of the truth than they dare live, and their eternal conjectures and mouthings about abstract truth are usually indulged in for the purpose of attempting to avoid vital issues. "What is truth?" asked Pilate—and did not pause for answer.

Wearing of Wool.

Some years ago a book was published to prove that if you wore nothing but wool, even down to your bootlaces, almost all the ills to which flesh is heir would disappear, and that people who were inclined to embonpoint would grow quite slim and become active enough to jump a five-barred gate. The fad had a good deal of success, and nobody denies it a certain amount of reason and truth; but the millennium will not be inaugurated by the wearing of blankets, and the dog-days still call loudly for something thin in the way of raiment.—Exchange.

It Is Not Here.

There are only two seasons—the wet and the dry—at the equator in Africa. The former is the summer season and lasts eight months. The thermometer averages from 110 to 125 degrees Fahrenheit.

BUSY BEE RESTAURANT
(UNDER THE OLD MANAGEMENT)

There is no connection whatever between the Busy Bee and Casino restaurants. The Casino being a new and entirely different company.

Harry Haves, Proprietor
Busy Bee Restaurant
429 McKean Avenue - - Charleroi, Pa.

Cleans School Erasers.

With the electrically driven machine recently developed by a manufacturing concern in the east erasers are cleaned right in the schoolroom or in the corridor. No need to throw them into a basket and take them outside or into the basement. A small girl can operate the device and get the erasers thoroughly clean, says The Electrical Experimenter. Turning the switch sets a rapidly revolving brush in motion. This loosens the dust and the suction developed by the motor extracts all of the dust from the surface and crevices of the felt. The dust is drawn into a section of the base. The air created by the strong suction is filtered before it comes out of the exhaust.

Bees Hum in Sharps.

Landoise, the famous naturalist, has calculated that to produce the sound of F the fly vibrates its wing 352 times a second, and the bee to create A vibrates 440 times a second. A tired bee hums on E sharp. This change is, perhaps involuntary, but undoubtedly at the command of the will, and is similar to the voice. When seeking honey a bee hums to F sharp. Landoise noticed three different tones emitted by insects—a long one during flight, a higher one when the wings are held so that they cannot vibrate, and a higher one yet when the insect is held so that none of its limbs can be moved.
